- 1 Unaudited – in calculating the NTA, EAIT asset values have been calculated using unaudited absolute return fund performance estimates for the month being reported.
- 2 For the purposes of calculating the above figures, the Australian Equivalents to International Financial Reporting Standards (AEIFRS) have been applied (other than for classification of net assets attributable to unitholders of EAIT where Australian Generally Accepted Accounting Principles, as applied before the introduction of AEIFRS, have been used).
- 3 Following the announcement of the intention to separate EAIT into two funds, performance data from 1 June 2009 onwards represents the underlying absolute return funds only. Prior to 1 June 2009 the performance data reflects both the absolute return funds and direct investments.
- 4 The May 2007 monthly NTA performance was impacted by the EBI rights issue and placement which were completed that month and does not include the implied value of EBB shares received by investors who successfully participated in the EBI capital raising. The May 2007 performance of the underlying investment portfolio (excluding the effect of the capital raising) was +2.40%.

Market Commentary

The volatility that began at the end of June continued unabated into July as lower commodity prices, led by oil falling nearly 21% to just over \$47 a barrel, led to a meltdown in the energy and metals sectors. In addition, continued political drama in Europe surrounding the Greece situation, including a 14% drop in the Shanghai Composite despite efforts by the government to prop up the market, all added to investor concerns. In spite of this risk assets finished the month strongly, with the S&P 500 Index and the MSCI World index ending the month up 2.1% and 2.4% respectively.

Performance Commentary

The Everest Alternative Investment Trust was up 4.0% for the month of July (net of all fees and expenses). The underlying portfolio was down 0.5% in USD terms however the depreciation in the Australian dollar (from 0.771 to 0.731) contributed 5.5% to the total Fund performance. This compares to monthly returns for the S&P 500 Index of 7.3% (in AUD terms) and the S&P/ASX 200 Accumulation Index of 4.4%.

The Funds Multi Strategy managers had a somewhat challenging month. Its two largest exposures, TPG Axon and Cerberus, were down 1.1% and 0.6% respectively. In aggregate, these two positions detracted 0.2% from the total Fund performance.

Fund Update

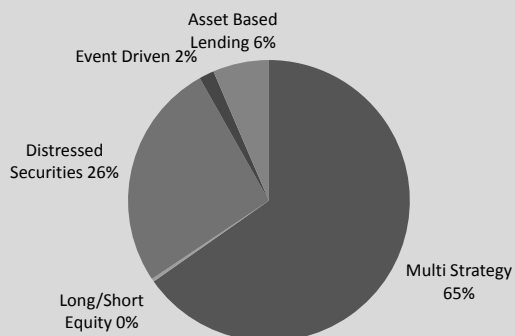

The Fund recently paid a distribution of 3.88 cents per unit (0.48 cents per unit 30 June 2015 taxable distribution & 3.4 cents per unit on 25 September 2015). The June taxable distribution of 0.48 cents per unit is reflected in the July 2015 price and the 3.4 cents per unit paid in September will be reflected in the September 2015 price.
