- 1 Unaudited – in calculating the NTA, EAIT asset values have been calculated using unaudited absolute return fund performance estimates for the month being reported.
- 2 For the purposes of calculating the above figures, the Australian Equivalents to International Financial Reporting Standards (AEIFRS) have been applied (other than for classification of net assets attributable to unitholders of EAIT where Australian Generally Accepted Accounting Principles, as applied before the introduction of AEIFRS, have been used).
- 3 Following the announcement of the intention to separate EAIT into two funds, performance data from 1 June 2009 onwards represents the underlying absolute return funds only. Prior to 1 June 2009 the performance data reflects both the absolute return funds and direct investments.
- 4 The May 2007 monthly NTA performance was impacted by the EBI rights issue and placement which were completed that month and does not include the implied value of EBB shares received by investors who successfully participated in the EBI capital raising. The May 2007 performance of the underlying investment portfolio (excluding the effect of the capital raising) was +2.40%.

### Market Commentary

Global equity markets got off to a volatile start in 2016 as investor concerns over a slowdown in China and a further deterioration in oil prices saw global stock markets selloff significantly over the month. In fact, 2016 saw the worst 10-day start to a year ever for the S&P 500, although stocks did manage to claw back a portion of the losses in the last two weeks of January. Overall, the S&P 500 Index declined 5.0% (after being down as much as 12% at one point) and the MSCI World index finished the month down 5.5%.

### Performance Commentary

The Everest Alternative Investment Trust was up 1.1% for the month of January (net of all fees and expenses). The underlying portfolio was down 1.3% in USD terms but the depreciation in the Australian dollar (from 0.728 to 0.709) added 2.8% to the total Fund performance. This compares to monthly losses for the S&P 500 Index of 2.2% (in AUD terms) and the S&P/ASX 200 Accumulation Index of 5.5%.

The Funds Multi Strategy managers had a somewhat challenging month. The Funds two largest exposures, the TPG Axon Side Pocket and the Eton Park Side Pocket, were down 1.7% and 0.2% respectively. In aggregate, these two positions detracted 0.4% from the total Fund return.

### Fund Update

The Fund recently paid a distribution of 0.99 cents per unit on 29 January 2016. The 0.99 cents per unit paid in January is reflected in the January 2016 price.
